Submersible Mixer Type ABS RW 200 and 280

50 Hz

Compact submersible mixer for flushing and cleaning of pump sumps.

Applications

The compact submersible mixers of the RW 200 / RW 280 series are designed for mixing applications in pump sumps, i.e. the prevention of sedimentation deposits and floating scum. They have a maximum continuous running time of one hour, and up to a total of eight hours in every twenty four.

The RW 200 / 280 series can be installed regardless of the tank shape and is suitable for the cleaning of pump sumps up to Ø 5 m or 24 m². Depending on the intensity of mixing required, one or more mixers may be installed.

The optimum flow direction for a particular application can be achieved quite simply by adjusting the mixer position horizontally or vertically (± 30°) on the mounting bracket.

Horizontal adjustment is not possible in a guide rail installation. In a hanging installation, swivelling in the horizontal plane is facilitated by the conical threaded pipe connection.

The coupling bracket, adjusting plate, and 10 m cable with free cable ends, are supplied as standard.

For optimum selection in general mixing applications the following information is required:

- Application
- Tank / sump dimensions
- · Medium to be mixed
- · Viscosity and specific weight of medium
- Temperature, dry matter content etc.

Construction

- Water-pressure-tight encapsulated modular motor with cast iron housing, oil chamber and propeller, form a compact, robust, unit construction.
- 3-phase, 4-pole motor, 1 450 minimum r/min, insulation class F, protection class IP 68.
- Rotor shaft supported in lubricated-for-life ball bearings.
- Tandem shaft sealing with lip seal and silicon carbide mechanical seal as standard. Option of viton mechanical seal.
- Patented solids deflection ring protects the mechanical seal from damage by ingress of solid or fibrous matter.
- Blockage-free, cast iron, 2-blade propeller.
- Thermal sensors in the stator give a warning and switch off the unit if excessive temperatures are reached in the motor.
- Maximum allowable temperature of the medium is 40 °C.

Materials

Description	Material	
Motor housing	Cast iron EN-GJL-250	
Motor shaft	Stainless steel 1.4021 (AISI 420)	
Oil chamber	Cast iron EN-GJL-250	
Propeller	Cast iron EN-GJL-250	
Fasteners	Stainless steel 1.4401 (AISI 316)	

Features

- Easy installation
- Small space requirements
- Adjustable bracket allows direction to be altered
- · Guide rail mounting option
- · Cast iron housing
- · Wear-resisting propeller
- High power reserves
- · Patented solids deflection ring
- Modular motor
- · Available as standard or explosion-proof

Identification code: e.g. RW 2022 13/4 Ex Hvdraulics:
